

Open letter to VB

Dogecoin

March 2, 2023

Dear Vitalik

First of all, we want to thank you for all the work you do. Done so far on Ethereum and shaping a positive mindset and perspective. Cryptocurrencies as a whole. The progress you have made in altruism and technological progress has not been . lost in us because it has enabled many people to complete it. Something they never expected in their wildest dreams, contribute to the block field

The Jubilee Foundation brings this proposal to you on behalf of the Dogecollie community. Dogecollie Humbly started as a decentralized meme coin and thought experiment, just below two months ago, although Jubilee had several years of ideas. In this short period of time, a lot of things have happened that made us restart, The effort was totally worth it, even early in our journey.

To delve into the key to this letter, I and the Dogecollie community hope. Make sincere requests. We don't use the token as a foundation, it's simply a marketing gimmick. Unlike many other "dog" coins or "Inu coins". Dogecollie totals only 1 billion? We want you to get involved in our community and join us.

To do this, we burn 45% of the total supply into a black hole, i.e. 450 million Dogecollie tokens. 45% of the total supply participates in the public offering 10% for 12 months linear release 10% is held by the foundation, Reward the community with high-quality articles for airdrops, as well as charitable donations. Educate others about cryptocurrencies with us.

We know that since the rise of SHIB, Doge, many clones have come and gone, Trying to piggyback the hype, and the success they had. In Dogecollie, Our goal is to open up a new path to spread Christian values in the world of blockchain, Striving to promote the development of public welfare and improve human welfare, we aim to create a new community family that integrates the Christian faith, and we have given Dogecollie a new mission to develop a digital business platform within the community by using Dogecollie as a bridge. Dogecollie Community Mall, where users can use Dogecollie tokens to purchase goods and services in the mall. Further promote the combination of the real economy and the virtual economy to drive the development of the real economy. People will truly discover precious ecosystems. We do not use this as a means to get rid of our own charitable contributions, on the contrary, because it will allow us to accomplish more than we have already accomplished.

Dogecollie has no taxes, no central authority, no governance system, but something similar. For our mascot, Dogecollie, we are a collection of faith, courage and Beloving, and they will do whatever it takes to achieve our goals. We will love to have you with us in any way we can. Watch over this community like God and let it thrive, while also allowing the flower of faith to bloom in this blockchain wasteland.

Most cordial regards,
Jubilee Foundation Ethics Church
